

THE EVIDENCE-BASED TESTOSTERONE GUIDE

Research-backed ingredients. Transparent dosing. The formula logic behind Peak Performance.

WHAT THIS GUIDE DOES

Shows the exact formula, explains why each ingredient is in it, and frames the decision clearly: build the stack yourself or preorder the formula.

THE PROBLEM

WHY MOST TESTOSTERONE SUPPLEMENTS FAIL

- Underdosed ingredients that never reach meaningful levels.
- Proprietary blends that hide what you are actually taking.
- Ingredient lists built for marketing instead of logic.

THE SYSTEM

HOW THE FORMULA WORKS

Peak Performance targets three biological limiters that commonly affect testosterone function and performance in men.

STEP 1

Foundational Hormone Inputs

Vitamin D3, zinc, magnesium, and fenugreek provide the essential nutrients and enzymatic support your body relies on for testosterone synthesis.

STEP 2

Stress Balance

Chronic stress elevates cortisol, which suppresses testosterone production. KSM-66 Ashwagandha and Tongkat Ali help lower cortisol, removing a key barrier to hormonal balance.

STEP 3

Free Testosterone Availability

Boron reduces SHBG, the protein that binds testosterone and limits its use — helping make more of your natural T available for the body.

THE STACK

THE PEAK PERFORMANCE FORMULA

- Vitamin D3 — 3,000 IU
- KSM-66 Ashwagandha — 500 mg
- Tongkat Ali — 300 mg
- Fenugreek — 500 mg
- Magnesium — 30 mg
- Zinc — 20 mg
- Boron — 9 mg

Seven ingredients. Every dose disclosed. Each one in the formula for a reason.

No proprietary blends. No hidden doses. If it's in the formula, you know exactly what it is and why.

INGREDIENT BREAKDOWN

EVERY INGREDIENT. EVERY DOSE.

VITAMIN D3 3,000 IU

Cholecalciferol

Clinically shown to increase testosterone levels in men with low vitamin D status. Vitamin D functions more like a hormone than a typical vitamin — low levels are directly linked to reduced T.

KEY BENEFITS

- ✓ Increased total testosterone in clinical trials
- ✓ Supports free and bioactive testosterone levels
- ✓ Corrects a deficiency linked to low T

MAGNESIUM 30 mg

Bisglycinate

Directly correlated with testosterone levels — higher magnesium means higher T. One of the essential minerals most commonly depleted by training.

KEY BENEFITS

- ✓ Positively correlated with testosterone levels
- ✓ Supports both total and free testosterone
- ✓ Essential mineral depleted by training

ZINC 20 mg

Citrate

Essential for testosterone synthesis — zinc deficiency directly lowers T levels. Required for the enzymatic processes behind testosterone production.

KEY BENEFITS

- ✓ Required for testosterone synthesis
- ✓ Restores T levels in deficient men
- ✓ One of the most studied T-support minerals

FENUGREEK 500 mg

50% Saponins Extract

Meta-analysis confirms significant testosterone increases across multiple trials. Works by inhibiting the conversion of testosterone to estrogen.

KEY BENEFITS

- ✓ Significant T increase across multiple studies
- ✓ Inhibits testosterone-to-estrogen conversion
- ✓ Meta-analysis confirmed effectiveness

KSM-66 ASHWAGANDHA 500 mg

KSM-66 Root Extract

Clinically proven to increase testosterone by 14-17% while lowering cortisol. Dual-action: hormonal and stress-based support in one ingredient.

KEY BENEFITS

- ✓ 14-17% testosterone increase in studies
- ✓ Reduces cortisol (which suppresses T)
- ✓ Dual-action: direct and indirect T support

TONGKAT ALI 300 mg

200:1 Extract (1% Eurycomanone)

Shown to increase testosterone by 37% in a 4-week clinical study. Reduces cortisol by 16% and releases bound testosterone from SHBG.

KEY BENEFITS

- ✓ 37% testosterone increase in 4 weeks
- ✓ Reduces cortisol by 16%
- ✓ Releases bound testosterone from SHBG

BORON 9 mg

Citrate

Shown to increase free testosterone by reducing SHBG in just one week. Unlocks the T that's already in your system.

KEY BENEFITS

- ✓ Increases free testosterone levels
- ✓ Reduces SHBG (testosterone-binding protein)
- ✓ Effects observed in just 7 days

YOUR DECISION

YOUR TWO OPTIONS

OPTION 1

Build It Yourself

Buy each ingredient separately. Manage multiple bottles, compare labels, and build the stack piece by piece.

OPTION 2

Preorder Peak Performance

Get the entire formula in one product — transparent, convenient, and built around the same logic in this guide.

- Every ingredient from this guide in one product.
- No juggling seven separate bottles.
- Built for people who actually read labels.

PREORDER PEAK PERFORMANCE

Research-backed ingredients for people who read labels.
